Subject:	Juneau Talking Points

I'm done for the day but wanted to at least get a start on talking points. Most are taken from website language, but added some about EPA/WDNR interaction, regulatory authorities, next steps....

Juneau County Groundwater Screening Investigation

Talking Points:

- On April 30 through May 3, 2018, EPA sampled groundwater in the Town of Armenia, after receiving complaints of private drinking water well contamination.
- EPA collected groundwater samples at 41 temporary boring locations and 5 drinking water wells. The samples were analyzed for multiple parameters, including nutrients. Private well results have been provided to the homeowners. [EPA also collected private well samples from X homes in the area in October 2017. The results have been shared with the homeowners.]
- EPA used temporary or "point-in-time" groundwater sampling techniques with the goal of characterizing pollutants in groundwater. This information can be used to identify potential sources of groundwater pollutants and potential impacts to drinking water sources.
